

What size American and MIA-POW flags should I get?

The size of the pole matters!

There is a certain size flag that is to be flown for a certain size flag pole. The major reason for this is wind speed.

Before you purchase 'the same size you've always purchased', please consider the length of the flag pole. A larger flag does not show more respect, flying the correct flags instills the highest level of patriotism.

Please use the following table before buying your next flag:

Flagpole Size	American Flag	POW/MIA Flag
15	3 x 5	3 x 5
20-25	4 x 6	3 x 5
30-40	5 x 8	4 x 6

The purchasing department would like to thank Maintenance Mechanic and member of the Veterans Committee Pat Gunning for bringing this to our attention.
