

Sno-Pro Snow Broom

These are meant to be used by custodians to remove the snow that accumulates on Postal Vehicles overnight. Since they do not have an extendable handle, the handle is significantly more robust than typical snow brushes.

Sno-Pro Delivery Vehicle Snow Scrapers/Removers, Carrier Winter N1027192

Order

provided by **POSTAL PRODUCTS UNLIMITED**

Price: **\$15.01**

Supplier Part No: 75342

Unit: EACH

Contract: 3DVDIE-11-B-0009

Description: This brush stands apart from others because it can be used on the entire body of the vehicle in addition to being used on the windshield. Industrial grade polyethylene foam gently removes debris from the vehicle without damaging the paint. The handle extends your reach by 48" to remove snow from the top of the vehicle. Features: Industrial grade polyethylene foam head; 17" W x 5"; 48" vinyl coated rolled steel handle; Approved for 'Class A' finishes

Environmentally Preferable Product Attributes

FAQ –

1. Only for custodians?
 - a. Anyone can use it, but they should be kept at the station. For the snow that builds up with out on a route, standard snow brushes are sufficient.
2. How many can I purchase?
 - a. Typically, we will approve 1 for every 15 LLV's. If additional staff are assisting this empowers them to help.
3. I have 14 LLV's, can I purchase 2?
 - a. Yes, you can purchase an additional snow broom. This helps if more than one employee is cleaning the LLV's and ensures that tool breakage doesn't stand in the way of mail delivery.
4. I would prefer that all of my LLV's have these instead of snow brushes.
 - a. Finance will not approve. The snow brushes are sufficient for the task and these do not have ice scrappers. If every LLV were outfitting with one of these, the cost would exceed \$35,000.
